

Tracking False Conservatives

Written by Todd Maynard

In my last blog, I expressed concerns that our "Freedom Movement" may be co-opted by conservatives that have less than honorable intentions.

On May 1st, which incidentally is a holiday created by the communists to celebrate the founding of the New World Order conspiracy and the Illuminati, Glenn Beck and Judge Andrew Napolitano are on the Fox network together discussing liberty issues. Here is the video...

Among the solutions offered was how the people, through their state legislatures, should eliminate the 16th amendment and finally do away with the graduated income tax altogether. I agree that the 16th needs to go, but I most certainly do not agree with the solution that the judge proposes.

Article V of the Constitution is a very tricky clause in our constitution. It is the process that is used by either the Federal Government or the State Governments to amend or change the Constitution.

The problem with the use of the Constitutional Convention rather than the traditional method of amending the constitution, which starts in Congress, is the fact that the Congress can only propose one amendment at a time and then the states must ratify it. The state governments, who created the federal government in the first place, can, through a Constitutional Convention, propose as many amendments as they want to while the Convention is still gathered together.

This creates a problem for us all. Sure we want to abolish the 16th, but what about the 2nd? Or the 1st? Or the 4th? The states could even be willing to completely rewrite the Constitution, which did happen when our Founding Fathers decided to scrap the Articles of Confederation in favor of writing the Constitution that we have today.

The John Birch Society has been fighting against what these two "conservatives" are proposing for many years. We have stopped the progress of the CON-CON for many years now. Here is part one of a video that we produced several years ago to educate state legislatures about this issue. It is a four part video of which the link below is part one.

We have these videos for sale as well. We suggest that you talk with your state legislators and give them copies of this video. We must avoid a CON-CON at all cost.

I must say again that I am very skeptical of these "Conservatives" that are now jumping on the "Libertarian" train. Is this just ignorance on the part of the judge as to exactly what the implications of a CON-CON really are or is this an attempt to mislead those that have recently awakened to the fact that there is something wrong with in country.

Vladimir Lenin said that Communism had to be built with Non-Communist hands and in many cases it was. Could this be another trick by the New World Order conspirators to get freedom loving Americans to destroy their own freedom in the name of saving it?

It is said that the path to hell is paved with good intentions. But in just about every case that I have looked at, the people that did the paving knew exactly where that road would lead.
