

Houston physician warns Pfizer and Moderna mRNA vaccines don't provide immunity against coronavirus

Summary/transcript of the video presentation made by Dr. Steven F. Hotze, M.D. ([Hotze Health & Wellness | Houston TX Hormone Replacement \(hotzehwc.com\)](https://www.hotzehwc.com));

<https://www.hotzehwc.com>

Article, summary and Video presentation found on the [Covid-19 Information](https://www.njiat.com/x-Covid-19.html) link located at <https://www.njiat.com/x-Covid-19.html>

1. The so called Covid-19 “vaccine” is not a vaccine at all.
2. It’s a dangerous, experimental gene therapy.
3. The so called Covid-19 “vaccine” does not provide any individual who receives the “vaccine” with immunity to Covid-19. Nor does it prevent the spread of the disease.
4. According to the **CDC** that gives the definition of a vaccine on its website, the Covid-19 vaccine does not meet the definition of a vaccine.
5. So, since the Covid-19 does not fit the definition of a vaccine by CDC, it is a deceptive trade practice under *15 US code, section 41* of the Federal Trade Commission.
6. The pharmaceutical companies are lying to the public and the government health bureaucrats are also lying to the public by calling this treatment a “vaccine”.
7. The Covid-19 experimental gene therapy is only designed to minimize your symptoms if you were to be infected with the Covid-19 virus.
8. Dr. Hotze emphasizes that this Covid-19 experimental gene therapy does not meet the CDC’s own definition of what a vaccine is.
9. It does not provide immunity or prevent the spread of the disease!
10. By referring to this therapy as a “vaccine”, the pharmaceutical companies are attempting to shield themselves, because vaccine injuries or deaths are exempted by law from any product liability lawsuits.
11. Operation Warp Speed. On December 11, 2020 the FDA approved the Pfizer “vaccine” and Moderna’s “vaccine” was approved just a week later.
12. These so called “vaccines” were approved without any published animal studies. And without any long-term human studies.
13. This means that individuals who get these so-called experimental gene therapy “vaccine” treatments, are guinea pigs!
14. These so called “vaccines” are manufactured using cells derived from **human babies** that were aborted in the 1970’s—they are untested experimental gene therapy.

15. Moderna is a pharmaceutical company located Cambridge, MA that was founded in 2010 as ModeRNA Therapeutics—Moderna has been developing experimental gene therapy using synthetic mRNA for the treatment of various diseases, including Covid-19.
16. Moderna *has never successfully developed* any product for treatment of any disease prior to Covid-19—experimental gene therapy using synthetic mRNA to treat infectious disease has never been attempted in humans. Why? Because of its failure in previous animal studies.
17. The theory behind conventional vaccines is to inject a small amount of the infecting virus or the bacterial protein into you body. This will cause your immune system to produce anti-bodies to that infecting organism and provide you with immunity.
18. Covid-19 “vaccine” is a synthetic messenger ribonucleic acid called mRNA and is an experimental gene therapy and not a vaccine. After the synthetic mRNA is injected into your body that inserts itself into your cells, not made from your DNA. It now begins to produce the Coronavirus spike protein. If you are perfectly healthy why would want to inject a foreign mRNA into your body?
19. There is no way to know how long your cells will produce these viral proteins or they will ever stop producing them!
20. Your immune system will be hyper charged because it’s having to fight off all of these viral proteins that your own body is making all the time.
21. And it will overreact when exposed to any type of Coronavirus in the future!
22. This is what happened when mRNA experimental gene therapy was used in testing other types of Coronaviruses in animals back in 2005 and again in 2012.
23. The animals died from an immune system hyperreaction when they were later exposed to the Coronavirus against which they had been previously “vaccinated”. This hyper reaction is called an antibody enhancement reaction.
24. Because these are the first mRNA “vaccines” ever used in humans, you would think that they would have first been tested and proven safe in published animal studies.
25. And have at least two years of human testing which are routinely required for a vaccine. Instead, the Covid mRNA so called “vaccine” was only tested on humans for a couple of months.
26. Adverse effects are inevitable. The first month of the use there were more than 40,000 documented adverse reactions in the United States including thousands of cases of Anaphylactic Shock and serious Neurological problems. Because less than 10% of adverse effects are routinely reported to the vaccination board, hundreds of thousands of incidences and damages from the injections have likely occurred.
27. This is only in the first 30 days! As of February 14, 2021, there were also 934 deaths of individuals who have received this experimental gene therapy so call “vaccine”. Including baseball great Hank Aaron!
28. Dr. Hotze knows several individuals that took this “vaccine” unbeknownst to him that have died within two days. That’s no coincidence.
29. Even more worrisome are delayed and long-term adverse effects of this experimental gene therapy. The synthetic mRNA experimental gene therapy turns on the production of Covid-19 proteins, but it has no off switch! It just keeps on replicating and the immune system keeps on mounting an immune response against it.
30. That is why some researchers are concerned that it is going to provoke *auto-immune reactions*, setting you up for a lifetime of serious inflammatory disease.

31. Another major concern is the possibility that Covid-19 experimental gene therapy can make infections even worse! There's convincing argument that this experimental gene therapy may trigger an anti-body dependent enhancement reaction, that increases the virus's ability to infect your cells.
32. In other words, if you come down with a Coronavirus infection in the future after receiving your experimental gene therapy injection, then you may have a much worse case than if you never had this therapy in the first place.
33. That's when the treatment is worse than the disease. That's what it looks like this experimental gene therapy is. Many experts are predicting a surge of life-threatening infections, inflammatory disorders and death. Coming in months and years for those who have received this treatment.
34. Of course, the blame will be placed on a mutant virulence strain of Covid-19 virus, rather than on poorly tested experimental gene therapy. And then they will want to do mandatory vaccinations of everybody.
35. Even if it were acknowledged the US Government which has spent over \$12 billion on Covid-19 "vaccines" so far, would foot the bill for any damages incurred by those who received the treatment.
36. As Dr. Hotze previously mentioned, by law pharmaceutical companies cannot be sued for any injury caused by any vaccines. So, by lying and calling this experimental gene therapy a "vaccine", they are reaping enormous profits with no down risk of product liability.
37. Not only is the media downplaying the Covid-19 gene therapy side effects, but they seem content to simply repeat the drug makers overly optimistic claims of efficacy.
38. You probably heard that both Pfizer and Moderna vaccines are 95% effective. This is a false claim, it's a lie! Yet the medical establishment and the government bureaucrats have simply taken these pharmaceutical companies' words for it and are encouraging everyone to line up for this experimental gene therapy so called "vaccine".
39. At the time the Pfizer and Moderna products were approved these pharmaceutical companies had failed to release most of the raw data from their experimental trials. In fact, they are still withholding much of it, however now that more of it is available for review a different picture has emerged.
40. In the **British Medical Journal**, associate editor Dr. Peter Doshi had the opportunity to review the available data. And he pointed out the inconsistencies and the weaknesses of the pre-approval trials. He concluded, that rather than widely publicized 95% effective rate, these so called "vaccines" are at best only 19, that's one nine *19% effective*. At this low rate, they never would have been approved.
41. There are still many unknowns about this experimental gene therapy. There is no indication that it *saves any lives or prevents the spreading of the infection*, or your contracting the infections. Which is why health bureaucrats continue to recommend masking and social distancing, even after you have received these injections.
42. Nobody has any idea about the long-term adverse effects of this experimental gene therapy. Yet they are still plowing ahead with plans to inject this experimental gene therapy into the entire population.
43. This experimental gene therapy will not eradicate the Coronavirus that causes Covid-19 anymore than the flu vaccine is eliminated the flu. Covid-19 is here to stay even with the so called "vaccine". Infections will slow as more people develop **natural herd immunity**.

44. Why in the world would you risk all the known and unknown, short term and long term side effects of an experimental gene therapy that was inadequately tested, rushed through the approval process at “warp speed” and found to be much less effective, yet more dangerous than initially promised and more dangerous than the Covid infection itself?
45. **Dr. Hotze is advising his family, friends and guests here at the Hotze Health and Wellness Center, to just say NO! NO, I am not going to take this experimental gene therapy “vaccine”!**
46. Covid-19 infections pose no significant health risks except to those that are infirm and elderly and those with severe pre-existing conditions. Not unlike the flu or any other respiratory infections.
47. **Most individuals who contract Covid-19 have mild or moderate symptoms for a few days, similar to the flu and the overall survival rate of those who are infected is 99.98%!**
48. It’s very seldomly lethal except in those that are infirm and elderly and have pre-existing health conditions. It has been demonstrated in studies around the world that the use of **Ivermectin** and **Hydroxychloroquine** can safely prevent and treat the Covid-19 infection.
49. Of course, it’s important for you to strengthen your immune system with vitamin and mineral supplementation, healthy eating, natural hormone replenishment, treatment of allergies, exercise and a good night’s sleep and maintaining your ideal body weight.
50. Aside from that, let’s allow this virus to just run its course in society so that we can develop herd immunity! Which is far safer and much more effective than this experimental gene therapy could ever be!
51. The panic and mass hysteria created by government health bureaucrats, by the media and politicians, is all about control, power and money!
52. **Dr. Hotze has written extensively about the ineffectiveness and dangers of wearing masks, of social distancing, of closing businesses and lockdowns. We need to get back to work, back to school and back to church.**
