

*We are passionate about ensuring all children have access to the best possible education. We will listen to parent and teacher feedback and use it to improve our district, so that all children can thrive. We know that a great education system is not something to take for granted. The district and board can't do it alone. We need the community's help to make it happen.*

Here are some specific items that ABB believes are important for our district:

## **High Quality Education:**

FRSD students deserve a high-quality education that prepares them for success in a rapidly changing world. This includes providing teachers with the professional development they need to deliver effective instruction and make sure we offer a rigorous curriculum that focuses on the essential skills and knowledge that students need to thrive.

## **Parental Involvement:**

Parents play a vital role in their children's education by staying informed about their child's learning. Collaboration between parents and schools is essential for student success.

## **Report Cards:**

We believe 5th and 6th grade report cards should return to traditional letter grades to ensure a smooth transition to middle school grading expectations.

## **Field Trips:**

We believe that field trips should be an essential part of the educational experience for all students, and we would support the district's efforts to provide them.

## **Teachers & Staff:**

We are fortunate to have such amazing teachers and staff at FRSD. We want them to know that we value their hard work and impact on our students. We stand behind them and are committed to supporting the district as a strong board that advocates for both students and staff.

## **Fiscal Responsibility:**

We are committed to fiscal responsibility and will work with the district make sure the budget is balanced, that efficiency is improved, and that the district is looking to generate additional revenue.

## **Standardized Test Scores:**

The district needs to focus on improving scores on standardized assessments in ELA and math.

## **Student Behavior & Discipline:**

The district should revise the code of conduct in collaboration with staff in order to set consistent consequences throughout the district and improve the learning environment.
